## HOW TO CARVE A CAILLOU PUMPKIN

In *Caillou's Halloween DVD*, Caillou and his family create some jack-o-lanterns! Follow these easy steps to learn how you can carve a pumpkin too!

### MATERIALS

Caillou Pumpkin Carving Template

Pumpkin carving kit (or grab a knife and ice cream scooper).

### STEPS

**1.** Cut a wide circle around the pumpkin stem using your knife. Press knife in softly to break the pumpkin skin. Pull the cut lid off the pumpkin by the stem.

**NOTE:** Some prefer to cut a hole on the bottom. This will let your pumpkin have a flatter bottom and may be easier to place candle inside.

**2.** Using your ice cream scooper, scoop out the inside of the pumpkin.

**3.** Tape the Caillou Pumpkin Carving Stencil to your pumpkin, making it as flat as possible.

**4.** Using your knife, poke holes along the black lines of the stencil, so that when you remove stencil you should see design outline.

**5.** Remove Stencil.

**6.** Using knife, connect the dots and carve out the black-filled sections of the stencil

**7.** Your pumpkin is now ready! Put it outside for all to see, and place candle inside on Halloween night!
